

100% coverage of the business company universe in Romania on D&B Database – over 1.8 Million Records!

Natalia Dimitrov – EMC Leader

In the past few years, customer demand for quality information on businesses from Romania has soared. Since this market represents important sources of new growth for our customers, we have focussed on driving improvements in this region.

As a result of this focus and significant investment, the **Romanian D&B database has expanded considerably with 900k Romanian records added this year and now provides 100% coverage of both the commercial company universe and business failures/ inactive companies in Romania.**

Over 1.8 million company profiles are available to our customers, whether the intent be to better understand the legal structure and proprietary framework of a company when initiating business or to establish the creditworthiness of a potential customer or supplier in Romania. The 2008 financials for all companies required by local law to file their accounts are now available for your retrieval from the D&B database. As of September 2009, you now have the ability to view up to 6 years financials (where available) on the Romanian companies. At the same time, we are identifying financials faster and incorporating them into our database so you can make quicker decisions with confidence.

A sample of a Romanian company report is available here:

D&B Country Risk Update on Romania – Dec '09

Romania is fighting the crisis. The country's GDP fell by approximately 8% in 2009 against the previous year.

As of 2007, Romania became a new member of the European Union. According to the World Bank latest Doing Business survey, Romania is among top EU reformers in speeding bankruptcy procedure. At the same time, Romania is among countries that made paying taxes easier. Romania simplified the enforcement of judgments by eliminating the need for an enforcement order and allowing the attachment of credit balance and accounts receivable.

Current D&B country information about Romania is available here:
